For the wall use the mini map to make sure it reaches the corner. For the smoke line up with the bricks then throw in the point show in the video.

B Site: Hookah Wall & Smoke

To position... line up with the wall until you see it disappear and you only see the security camera shown in the video. The wall is straight forward just aim at the general location in the video and check the mini map to make sure it can get across.

The smoke is harder to execute because it depends on jump timing. You want to jump first then throw q before you reach the apex of your jump.
